RED BOOK

CHAPTER 4

Categorization

DISCLAIMERS VERTICAL CATEGORIZATION MATRIX PEDIATRIC PREPARED STATUS SOURCES AND REFERENCES CATEGORIZATION QUESTIONNAIRE

DISCLAIMER

The AEMS Red Book is designed to be a resource document for use by Medical Direction Authorities responsible for the administrative, organizational and on-line medical direction of pre-hospital EMS personnel. It specifically recognized that variations from the guidelines contained within are not only acceptable, but also appropriate, depending on the individual circumstances of the involved areas and organizations.

By Statute and Rule, all advanced life support pre-hospital EMS personnel shall have administrative and online medical direction. These guidelines are not meant to act as a substitute, proxy or alternative to that medical direction. Any conflict between these guidelines and the individual EMS provider's medical direction shall default to the Administrative or On-Line medical direction.

This manual sets forth guidelines deemed by AEMS to be within the acceptable standard of medical care. It is specifically recognized that there are acceptable variations from these procedures and protocols, which may also satisfy the standard of care. This manual does NOT define, limit, expand or otherwise purport to establish the legal standard of care.

CATEGORIZATION DISCLAIMER

This Matrix is to be utilized as a guideline for field triage of patients. It is NOT intended to be all-inclusive. It is understood that General Emergency Departments should be able to initially evaluate and stabilize patients with emergency medical conditions. At any time there is an EMS concern as to the appropriate destination for a patient, medical control should be contacted.
